DEVELOPMENT EXPERIENCE

Change Up | changeup.herokuapp.com | *Ruby on Rails / Angular.js / PosgreSQL / D3.js / JavaScript*　　Sept. '14
- Developed a quick and secure financial tracker to allow users to connect and monitor bank account balances and visualizespending.
- Acts as a budget calculator for each category of expenditures, allowing goal setting
- Uses D3.js and SQL queries to see average amount spent in a day, month, week, and where/what money is spent on.
- Created and consumed an API using AngularJS
- Using Yodlee Data Aggregation API, Change Up features over 5000 banks inside the database.

Wefridgerator | ok-fridge.herokuapp.com **|** *Ruby on Rails / Angular.js / PostgreSQL / Node.js*　　Aug. '14
- Built a kitchen organization app that allows user to create unique groups to track the contents of their kitchen
- Uses Angular.js to allow users to drag and drop any item into a kitchen or shopping list where they can enter a quantity, expiration date and filter when the item belongs.
- Features a recipe maker that creates a recipe based on what item is in the users' kitchen or shopping cart using the Food2Fork API.
- Node.js was implemented during the 24 hour AT&T Car and Home Hackathon in Las Vegas, to allow connectivity to a smart refrigerator to display the current temperature of the refrigerator and freezer.

TasteBuds | https://github.com/qbabin/TasteBuds **|** *Swift / Objective-C / Parse*　　Sept. '14
- Developed a native iOS matchmaking app that allowed users to match with restaurant profiles.
- Using GPS technology, users can set a specific radius to find restaurants within that distance.
- Built during the Swift Hack Day 12 hour hackathon for GitHub in San Francisco, California.

YaLa Chat | yalachat.herokuapp.com **|** *Node.js / Express.js /Socket.io*　　Aug. '14
- Provided a safe and anonymous way for students to chat with each other.
- Uses Socket.io to allow real time communication between the front-end and back-end.
- Built during the Causeathon Hackathon, where my three person team identified, solved, and presented a solution for the non-profit organization YaLa Academy.

PROFESSIONAL EXPERIENCE

Kaden Photo
